

**HOYA SUN**

## **Fashion & Function.**

Introducing HOYA's New Mirror Sun Collection. With 9 attractive colours, your patients can express themselves with a stylish look that reflects both the sun and their personality. Mirror treatments work especially well in extreme light conditions no matter the time of year. This can help with unnecessary glare, making outdoor sports and activities more comfortable for your eyes.

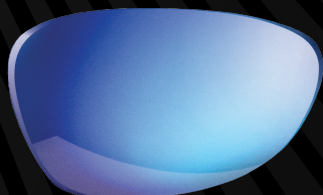

HOYA's mirror treatments, paired with our polarized lens base improves contrast and protects your eyes from harmful UV rays.

For pricing and availability, please contact your HOYA Territory Manager or Customer Care representative for more information.
